## INFORMATION CONCERNING YOUR PARTICIPATION IN THE U.S. PHYSICAL THERAPY, INC. 401(K) SALARY SAVINGS PLAN

This notice provides important information relating to your participation in the **U.S. PHYSICAL THERAPY, INC. 401(K) SALARY SAVINGS PLAN** (“the Plan”) for the plan year that begins January 1, 2021. This is not a notice of action, simply a reminder of plan features.

The notice covers the following points:

- How your Plan account will be invested;
- How you can manage your Plan account; and
- Who to contact about your Plan account.

**Note:** If you are not currently enrolled, are not eligible to contribute and/or do not have an account balance in your Plan, parts of the information on the following pages may not pertain to you. Also, if you would like more information about your Plan than what is outlined below, review the Summary Plan Description (SPD) that has been provided to you.

### HOW WILL MY PLAN ACCOUNT BE INVESTED?

The Plan lets you invest your account in a number of different investment options. As a Plan participant, you have the right to decide how to invest your account. **If you made an investment election with respect to your Plan account, the following information may not apply to you.**

Unless you choose or have chosen a different investment option, your Plan account may be invested in a default investment. Additionally, all of your future contributions to your account that you have not directed to a specific investment option in the Plan may be invested in this default investment. This default investment is known as the Qualified Default Investment Alternative (QDIA).

The Plan’s QDIA is the JH Multimanager Balanced LS. Its objective is to achieve a balance between a high level of current income and growth of capital, with a greater emphasis on growth of capital, by investing approximately 40% of the portfolio's assets in underlying portfolios that invest primarily in fixed-income securities and approximately 60% of its assets in underlying portfolios that invest primarily in equity securities.

Generally, a target risk\* asset allocation investment option offers diversification within the risk category. The risk category selected, as outlined by the investment’s name, is consistent with a target level of risk appropriate for participants of the Plan as a whole.

\*A Target Risk Portfolio (“Lifestyle Fund”) is a “fund of funds” which invests in a number of underlying funds. The Fund’s ability to achieve its investment objective will depend largely on the ability of the sub-adviser to select the appropriate mix of underlying funds and on the underlying funds’ ability to meet their investment objectives. There can be no assurance that either a Fund or the underlying funds will achieve their investment objectives.

**Note:** Even if some or all of your account is invested in the QDIA, you have the continuing right to direct the investments of your account in one or more of the investment options available to you under the Plan. If you decide to direct your investments, your transfer from the QDIA is not subject to any restrictions, transfer fees or redemption fees during the first 90 days of after the date of your first investment in the QDIA; however, other types of investment related fees (such as the investment option’s Total Annual Operating Expenses) may still apply. After such time period, your investment in the QDIA will be subject to the same restrictions, fees and expenses as are applicable to other participants who affirmatively elect to invest in the QDIA. For information about the types of fees associated with the investment option, review the “404a-5 Plan & Investment Notice”.

### **IMPORTANT CONSIDERATIONS WHEN MAKING INVESTMENT DECISIONS**

When making investment decisions, it is important to carefully consider your personal circumstances, current savings, monthly earnings and retirement lifestyle goals and risk profile. The principal value of your investment in any investment option, as well as your potential rate of return, is not guaranteed at any time. Also, neither asset allocation nor diversification ensures a profit or protects against a loss. Investment options can suffer losses at any time, and there is no guarantee that any investment option will provide adequate income at and through your retirement. Also, past performance is no guarantee of future results.
